BORGES

Design | Studio Kairos

Borges table series, designed by Studio Kairos, stands out with its aluminum leg structure with a unique form.

The Borges table series, which has various sizes and forms, has laminate color options in various shades. The legs and concealment panel are available in epoxy painted metal. Etajer is made of melamine board. Center lid and top drawer panels are locked. Vertical adjustment is possible on the drawer panel.

CALVINO

Design | Studio Kairos

Designed by Studio Kairos, Calvino is a desk group that easily fits into office architecture with its sleek but industrious geometric dimensions.

Calvino table systems feature rounded edges, simple shapes, and instead of the usual thickness of the top or frame, a thin line of only 4 millimeters connects the panel surface with the tapering frame. The legs are not angular and rectangular; they consist of a cylindrical piece that merges almost seamlessly with the building frame. Central locking system is used in side etagere table types. Drawer module and cabinet can be locked.

CAP

Design | Studio Kairos

Cap is designed as a personal workspace, providing a quiet haven in the midst of the busy pace of the open office.

SIZE
L: 1000 mm
D: 890 mm
H: 740-1565 mm

The product body is presented to the user by covering fabric on plywood shaped using molds. It is compatible with Borges table family with its aluminum leg structure. Group socket system, lighting and cable carrier accessories in accordance with various standards are offered together with the Cap product.

HAI

Design | Faruk Malhan

Hai is a height adjustable solution. Created with the user in mind, we created a sleek design that can suit both home and office settings. the Height adjustability allows for worker to sit-stand at the desk during the day to allow for better blood circulation.

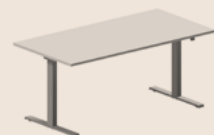

Desk top color variations are available in our Materials Library. Metal legs are available in all epoxy colors. Different fabric options are available for divider screen or modesty panel.

PI

Design | Tristan Lohner

Symbols are not only translations of certain concepts, but also graphic representations with their own aesthetic stance. The Pi table series, which won an award in the Silver category of the International Muse Design Awards, draws attention as a design that takes reference from the graphic structure of the pi symbol.

With the desktop panel you can easily create a two-person workstation adjacent to a single desk. On the square Pi tables, you can position four people set at social distancing by changing direction. In addition to the single work table type, there are also double and quadruple work tables, meeting tables and bar tables with shelves.

PORTE

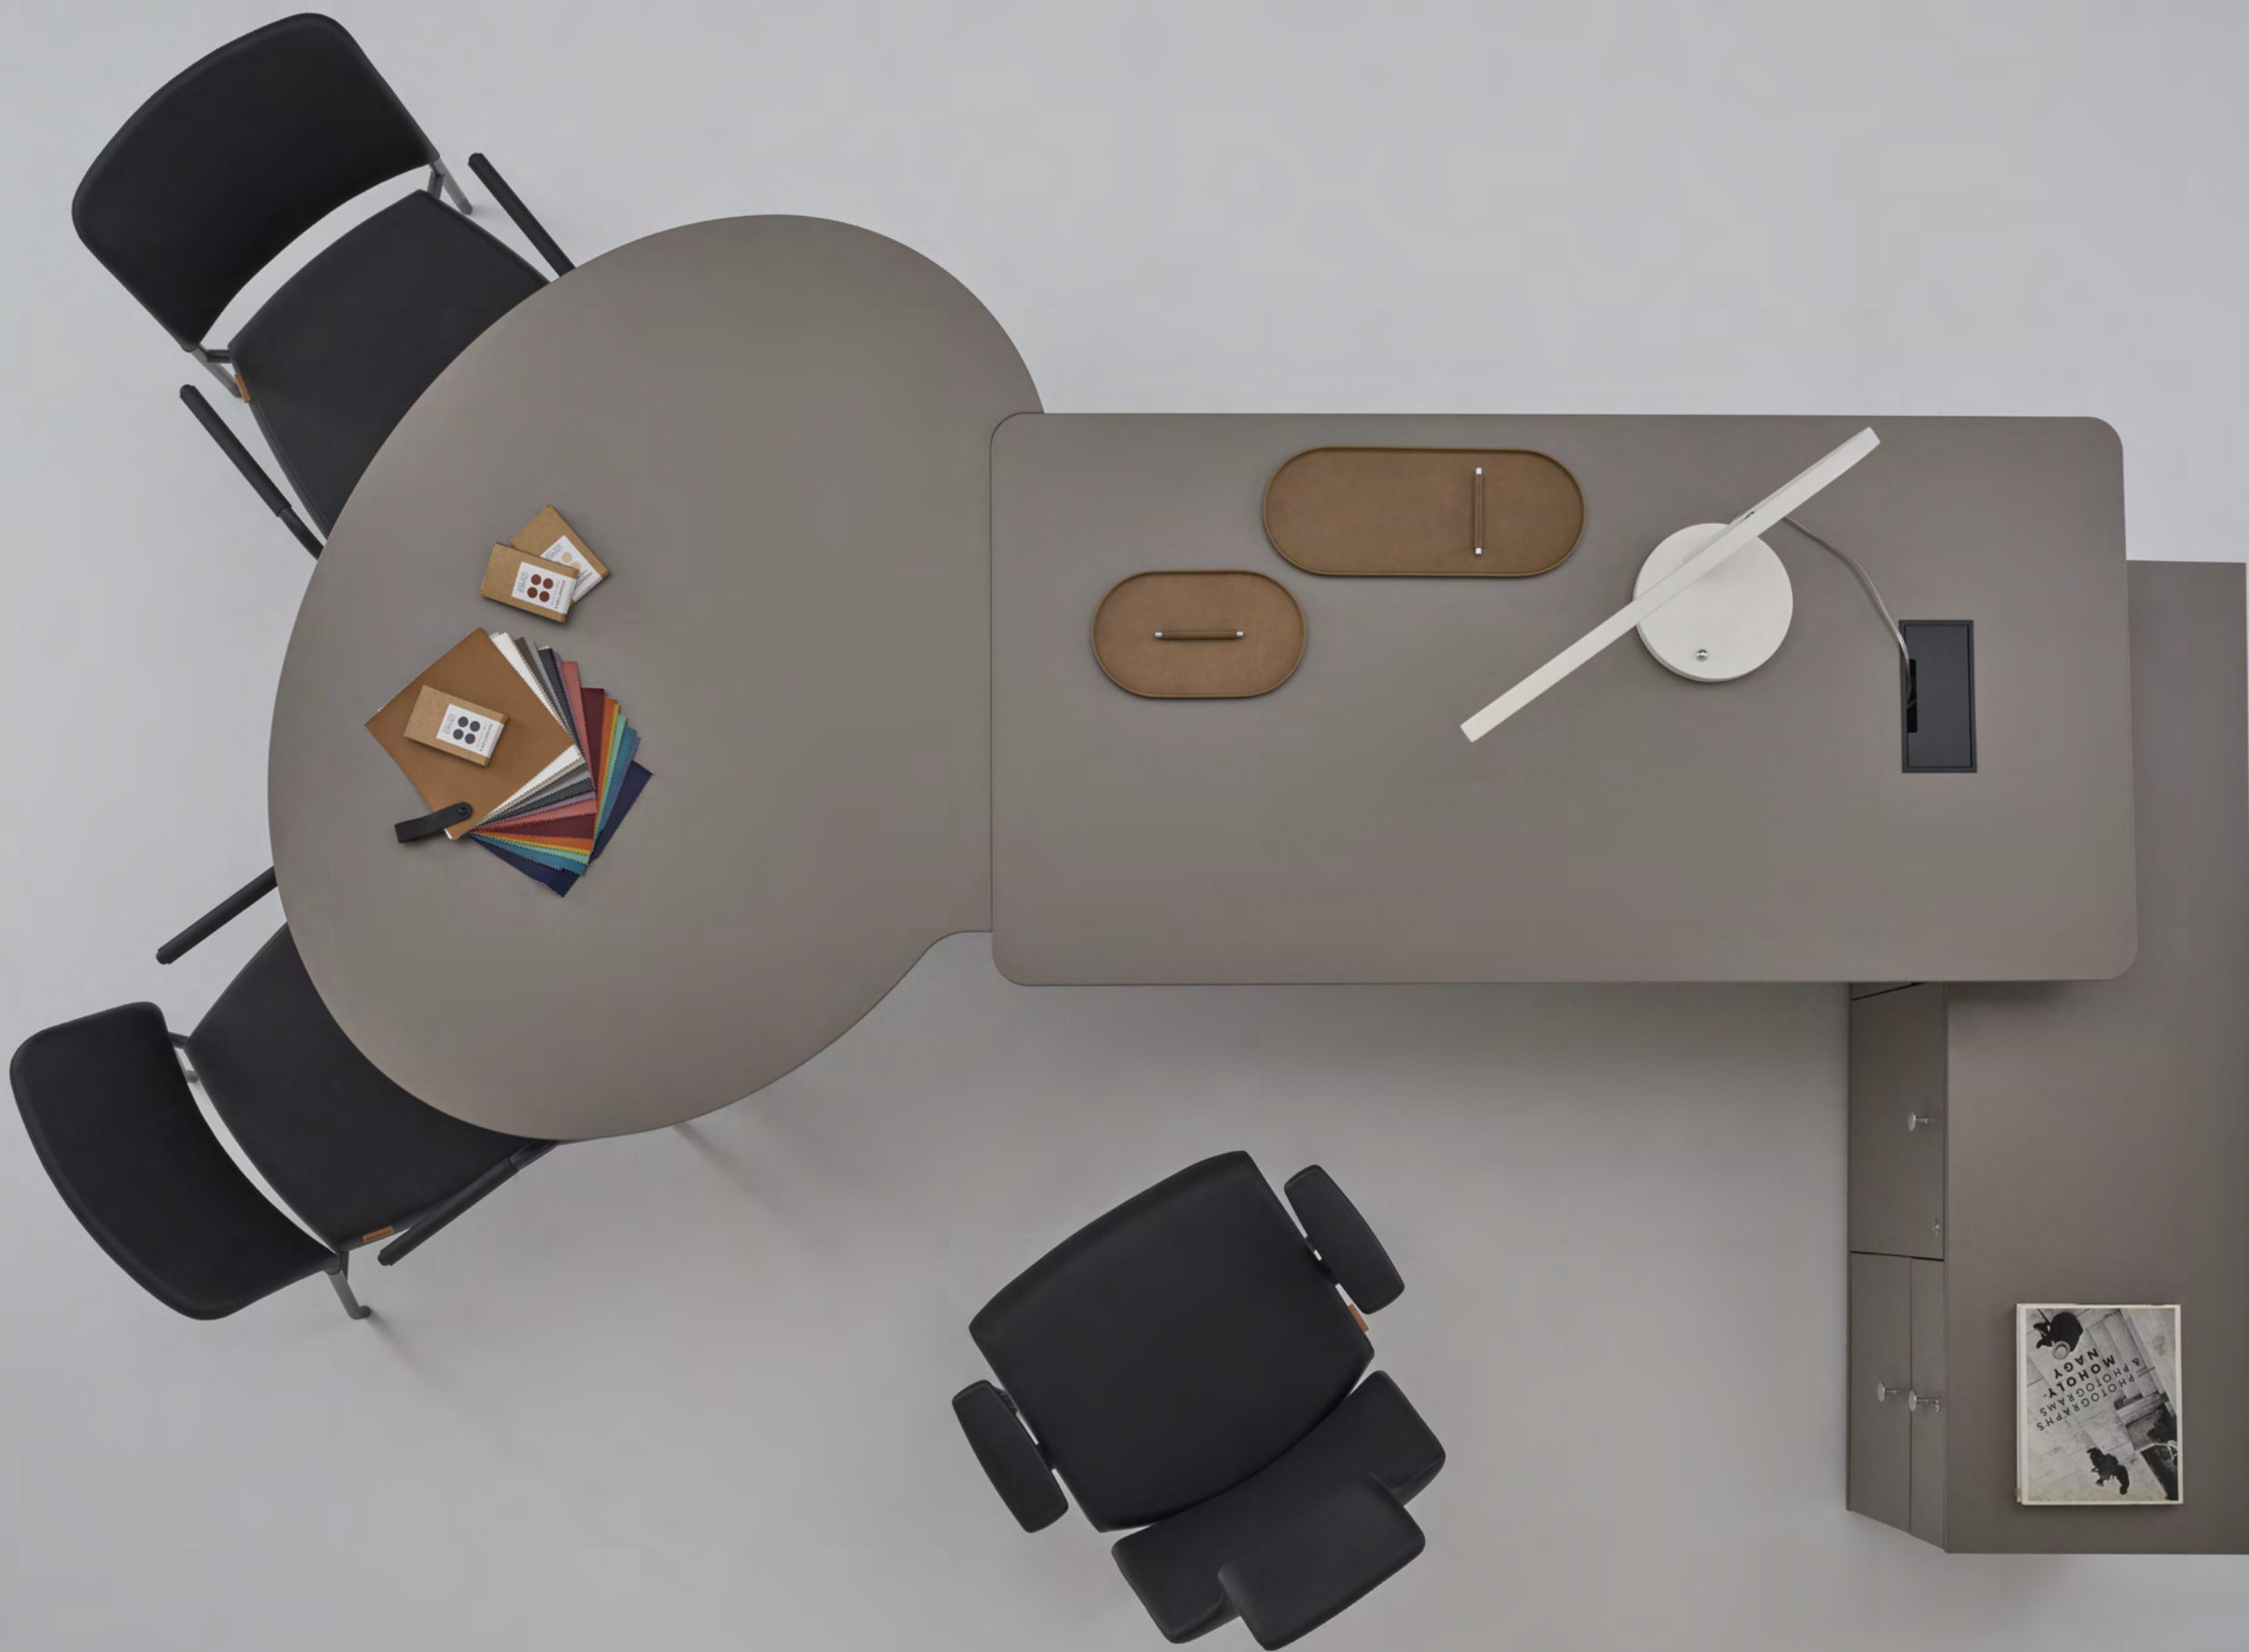

Design | Faruk Malhan

Porte is designed to provide significant freedoms to the worker through economies of space and fictional variety. All kinds of layout proposals derived from single and double tables are proposed as a series that is much more flexible and saves the user from the confusion of using right and left.

Tables are available in single and dual sided. For any larger composition, such as four, six or more people, double desks are placed adjacent to each other. Porte is designed with flexibility in mind, ease of installation and ability to maximize space while growing with little costs associated.

THRESHOLD

Design | Faruk Malhan & Koray Malhan

Threshold table series draws attention with its special leg design and waterfall detail on the edge of the table top surface. If you need extra storage space, an extra unit can be added externally on the side etagere. This approach allows flexible use of desk and storage items for new configurations.

In the product family, lacquered, laminate and electrostatic powder coating surfaces are offered with rich color options. There is an under-table cabinet with lockable drawers on the sides of the table and a concealment panel under the table. In addition to the table types of the Threshold family, there are also options in the storage category.

meeting tables

CONVIVIUUM

Design | Faruk Malhan

The Convivium series is a table series that includes an executive table and a meeting table that can be accommodate from eight to eighteen people. It is designed in oval form to facilitate communication between meeting participants.

MDF laminate or wood veneered table top, epoxy painted metal frame and middle leg, wood veneered or epoxy painted aluminum profile leg, epoxy painted metal or wood veneered cable cover. In coated tables, cable covers are coated in the same color as the table and in laminate tables, they are epoxy painted in the same color as the legs. Cable management is organized in such a way that it reaches the cable trays under the table through the special mid-leg structure and from there to the user with cable covers.

GLENN

Design | Koray Malhan

The Glenn table is a family of tables designed for large gatherings from 12 to 36 people. With its geometric dimensions, it easily adapts to the interior architecture of different offices.

Top tables are available in 3 different natural wood veneer options. The thin edge covers of the leg units are covered with natural wood to harmonize the leg and table surface. Genuine leather surfaces are used in the center of the table top and on the legs. The feet with natural leather detailing offer a stylish solution to cable density.

PARTITA

Design | Faruk Malhan

Partita meeting tables are designed with modulation to allow various sizes for different numbers of participants. Preserving the integrity of the design, the meeting tables added to the Partita family also use crossed legs, which are the basic feature of the series.

Tops are available in natural veneer or laminate. Legs are produced as wood veneer on aluminum. Cable covers are offered as epoxy painted or wood veneered according to the color of the table top on specially designed aluminum profile. Users can easily access all sockets through the covers along the center line of the table. The table top has a special Knife edge detail on all edges and the edges are polished with natural lacquer.

PORTE

Design | Faruk Malhan

Porte is designed to provide significant freedoms to the worker through economies of space.

Porte meeting tables are designed for co-working and meeting spaces as a continuation of the main series designed for workspaces. The specially designed epoxy painted steel legs create an elegant appearance and allow the table size to be utilized with maximum seating space.

common area tables

CANTATA

Design | Faruk Malhan

Cantata is a suitable alternative for use in public areas, classrooms, cafeterias, cafes and waiting areas. It attracts attention with its simple design.

Cantata table series table top is laminate over MDF and is offered with chrome plated or epoxy painted metal leg options. Thanks to the specially designed connection details that allow the feet to stand at an angle.

SWAN

Design | Koray Malhan

Adding value to workspaces, Swan combines an elegant structure with practicality. Designed to be used in in-office trainings and presentations, the Swan seminar table can be recommended for use in corporate meeting and training spaces.

With its high mobility, this system allows for many different arrangements.

One of its key advantages is that its units are foldable, stackable and interconnectable. Thanks to the wheels with brakes, the table can be fixed when the movement of the table is completed.

TERNA

Design | Studio Kairos

Terna is a coffee table group consisting of modules with different forms and heights that can be used both as a center and side table. It stands out with its slim-looking table top and asymmetrical geometric legs.

Terna consists of a thin sectioned wooden or marble table and metal legs. Available in laminate, veneer or marble, the table can be produced in round or square forms. The legs that carry this tray complement the different geometries asymmetrically. Epoxy painted metal material is used on these geometric legs that are cross-linked to each other.
